ABOUT OUR COMPANY

Ikantam is a mobile, web application and e-commerce development company with the main headquarters in Minsk, Belarus (Europe) and the staff of 30+ persons coming from the best local universities.

Our team helps business owners & online entrepreneurs implement their vision by using our experience, skills and ideas. Together with the customer (startup, marketing agency, IT consultancy or established business), we define the top project priorities for each client individually – time to market (minimum viable product), ways to cut costs, bug free focus, etc.- and the efficient ways to accomplish that. In our portfolio we have a large number of successful startups launched on US and European markets; advanced web and mobile solutions built for the existing businesses in Healthcare, Finance, Marketing and other industries; popular online stores and marketplaces operating on US market.

We are also operating our own products in Social Media Marketing and E-commerce industries that allows us to better understand all aspects of the business and prevent problems that our clients may face with.

EXPERIENCE

SKILLS

IDEAS

WEB APPLICATION DEVELOPMENT

WE USE THE MOST COMMON AND ESTABLISHED TECHNOLOGIES

Either you a young startup or established business our team is ready to help you to create a fully custom solution and provide continuous tech support. We use the most common and established technologies and techniques to ensure top quality and scalability of the final product; coverage of the code by authomated tests allows to reduce number of bugs and release projects in production much faster; skilled and experienced certified engineers of our team is your guarantee of work efficiency.

How do we differ from others? We are not just coders, we are also your mentors and partners. Many success stories with launching US/European startups, numerous success stories with large cumpanies allows us to provide advice, propose better solutions and use more effective approach for better output. Share your idea with us - we already know how to make it happen!

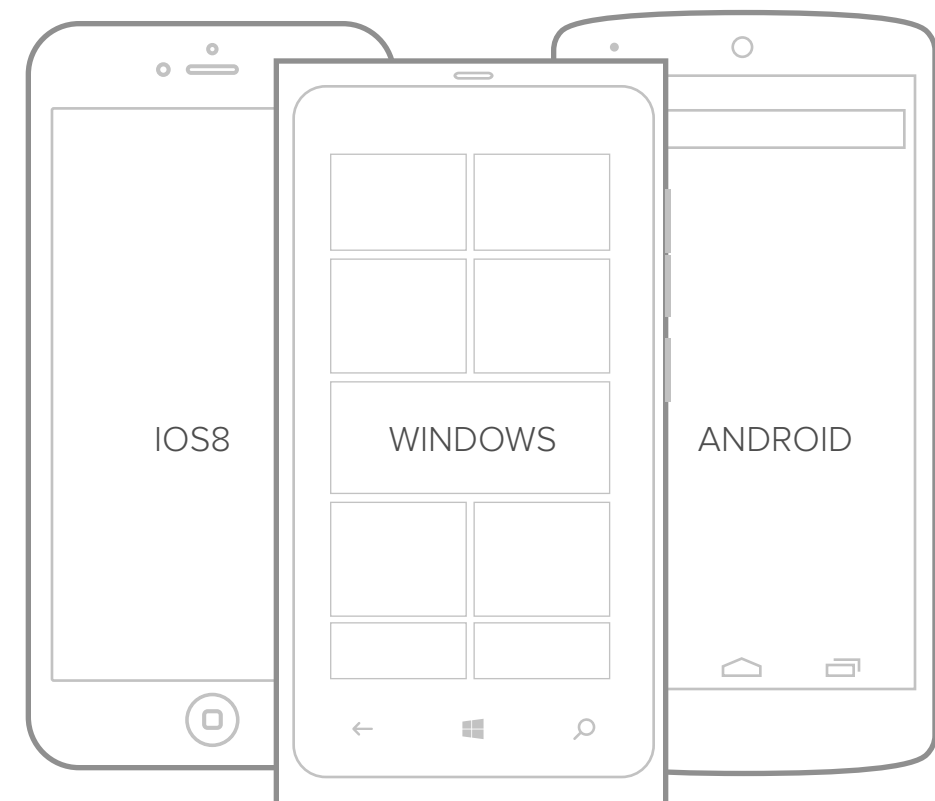

MOBILE APPLICATION DEVELOPMENT

Ikantam is the right choice if you want to launch a new mobile application or add mobile app to an existing web solution. We work with all common mobile platforms such as iOS, Android and Windows; also develop cross-platform mobile solutions using PhoneGap or similar frameworks. Experience with high-load mobile projects allows us to design the most effective and secure back end infrastructure that can be scaled as project grows.

In our portfolio you will find advanced ecommerce mobile applications with reservation and scheduling functionality, online ticket sales and events solutions, city guides, smart home mobile applications and many more.

Our skilled team of UI designers and Engineers can deliver the most effective product based on your idea or specifications. Your business success is our goal!

WE WORK WITH ALL COMMON
MOBILE PLATFORMS

E-COMMERCE DEVELOPMENT

Magento is a leading eCommerce platform. More than 250,000 merchants worldwide put their trust in this eCommerce software. Stand out from the crowd with the enterprise-level commerce solution tailored to fit your needs.

iKantam is the official Magento solution provider contributing free and premium extensions to Magento Connect marketplace. We have the in-house team of Certified Magento developers with the experience of completing custom Magento e-commerce projects of miscellaneous complexity.

IKANTAM IS THE OFFICIAL MAGENTO
SOLUTION PROVIDER

TESTIMONIALS

“Ikantam is absolutely the best! I would highly recommend them for any work. The team is very smart, creative, and full of great ideas. If you're looking for a team to do more than just execute exact requirements and rather help you develop requirements given their expertise in the e-commerce space then this is the team for you! Of course their execution is beyond excellent too. So all in all I'm a very satisfied client!”

Reham Fagiri / [AptDeco.com](#)

“I had a great experience working with iKantam. It's an absolutely awesome vendor. They helped me to finalize the alpha version of my startup project with a little delay but within budget and overall good quality. I recommend them to you

Michael Yevdokimov / [Mediaprojects.biz](#)

“This is my third project with iKantam and they are just outstanding. We continue to work together as they provide constant support for the projects they have created for me.

Mike / [Entrepreneur](#)

“I have worked with Paul and iKantam for almost a year now. Prior to working with them I either used my inhouse staff for simple projects or outsourced more difficult tasks to workers in India. After numerous dissapointments, I found iKantam via a friend and have used Paul and iKantam on 5 different projects each requiring different applications and technology. On each occasion I found Paul and his team more than up to the tasks set by me, and the end result far exceeded my expectations

Steven Grant / [Property Bangkok](#)

“To Whom It May Concern: Working with Ikantam was a refreshing experience after we have tried several contractors. The overall impression was very positive: the communication was 100% clear, the budget was met, the work was done on a high level and minor discrepancies (which are inevitable in any kind of contract) were resolved quickly, professionally and in a good spirit. We are definitely recommending Ikantam to others and are planning to use them in our coming web projects
